EDUCATION

Singapore Management University   **Ph.D**
Computer Science and Technology   *2019-present*

Shandong University   **Bachelor**
Computer Science and Technology   *2015-2019*

RESEARCH EXPERIENCE

Research Assistant   **Qingdao, Shandong**
ILEARN Laboratory, Shandong University   *Mar 2017 - present*
Supervised by Dr. Liqiang Nie

- **Explicit Interaction Model towards Text Classification**
  We introduce the interaction mechanism to incorporate word-level matching signals into the text classification task. In particular, we design a novel framework, EXplicit interAction Model (dubbed as EXAM), equipped with the interaction mechanism. We justified the proposed approach on several benchmark datasets including both multi-label and multi-class text classification tasks. Extensive experimental results demonstrate the superiority of the proposed method. As a byproduct, we have released the codes and parameter settings to facilitate other researches.
  We gave an invited talk at Zhihu Company about this paper.

  Accepted by AAAI 2019 as an oral long paper. (AC Rate=8.1%)

Summer Intern   **Beijing**
Conversation AI, Tsinghua University   *July 2017 - Sep 2017*
Supervised by Dr. Minlie Huang

- **Learning for Practice: Guide the Conversation System to Grow Up**
  We propose an open-domain dynamic conversation system that is capable of learning from the machine-human conversations. To the best of our knowledge, we are the first to jointly solve the logical and semantic inconsistency problems via learning from human feedbacks in open-domain dialog systems.
